

Operational Bulletin – JAX FLEX Chassis Fleet @ Sea Star’s Blount Island Terminal

Attention: Valued Sea Star Line Motor Carriers using JAX FLEX chassis in the Jacksonville, FL area:

Effective Monday, November 3, 2014, all JAXFLEX chassis servicing Sea Star Line customer cargo moving via the port of Jacksonville must be returned to the new chassis pool terminal.

The new JAXFLEX chassis pool terminal will be located at 10441 Alta Drive, under the management of Flexi-Van Leasing. Beginning on November 3rd, mounted containers (loaded or empty) arriving at the Sea Star Line Terminal will have the container removed and the motor carrier must remain hooked to the chassis for another container movement out of the terminal or return the bare chassis to the JAXFLEX pool on Alta Drive.

For all refrigerated cargo customers the same chassis process will be put in place and each gen-set will be mounted or dismounted upon each marine terminal interchange beginning on Monday, November 3rd. All gen-sets will be inspected and pre-fueled prior to mounting to increase the on-terminal efficiency for motor carriers.

Should you have any questions regarding this bulletin, kindly direct them to the below contacts or your local Sea Star Sales Representative.
